

Maths in Year 1

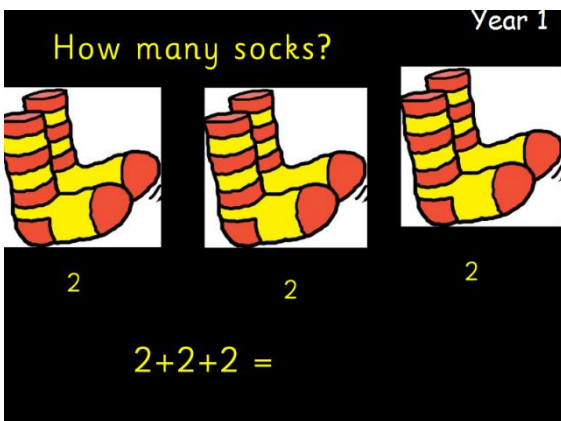

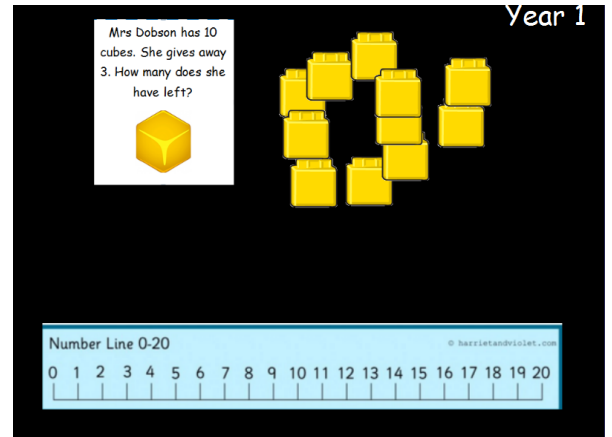

In year 1 we use objects to add and subtract numbers together.

We then move on to using a number line to jump forward and back.

The children should learn by heart

number bonds to 20.

For multiplication, we begin by counting in numbers for example 2s, 5s and 10s.

(2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, ...)

5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55....

10, 20, 30, 40, 50, 60, 70, 80, 90, 100....)

To solve multiplication problems we do repeated addition.

Division is done with objects we can share out. We use numbers that can be shared equally.
