

What is Attention Deficit Hyperactive Disorder (ADHD)?

ADHD is a neurodevelopmental disorder and refers to a pattern of behaviour that affects a child in most situations.

Symptoms of ADHD will be present across multiple environments and settings, and may include:

- **Hyperactivity** - Difficulties in sitting still, fidgety, agitated and always on the go
- **Inattention** - Difficulties in concentrating, being disorganised, being forgetful and often struggling to finish tasks
- **Impulsivity** - Speaking out and acting without thinking, interrupting others while talking and difficulty waiting for own turn to talk

If you suspect your child might have ADHD you can request an assessment by scanning the QR code:
